Methodology & Limitations

This memo documents the currency conversion applied to the uploaded trial balance. All amounts were converted to USD using user-provided closing exchange rates. 235 of 247 accounts (95%) were successfully converted.

Conversion Method: Closing rate applied uniformly to all account balances. No distinction is made between monetary and non-monetary items in this MVP. Rounding uses banker's rounding (round half to even) with 4 decimal places internally and 2 decimal places for display.

Interpretive Context: The results presented herein reflect automated data analytics and are intended to support, not replace, professional judgment. Identified anomalies may indicate areas requiring additional inquiry but do not, in themselves, constitute evidence of error, fraud, or material misstatement. The engagement team should evaluate each flagged item in the context of the overall engagement risk assessment and perform corroborating procedures as deemed necessary under applicable professional standards.

This memo documents automated multi-currency conversion testing procedures per IAS 21 (Effects of Changes in Foreign Exchange Rates). Results represent data anomalies identified through analytics and are not conclusions regarding internal control effectiveness, fraud, or material misstatement risk. The auditor must evaluate each flagged item in the context of the engagement and perform additional procedures as necessary per professional standards. This memo does not constitute audit evidence sufficient to support an opinion without corroborating procedures. Generated by Paciolus — Zero-Storage Audit Intelligence.
