Data Quality Pre-Flight Report

Client	Meridian Capital Group, LLC
Fiscal Year End	—
Period	FY 2025 (January 1 – December 31, 2025)
Source Document	Trial Balance Upload — FY2025
Source File	meridian_tb_fy2025.xlsx
Source Context	Exported from Meridian ERP (QuickBooks Enterprise) on Jan 15, 2026
Reference	PFR-2026-1023-203
Generated	23rd October 2026
Engagement Practitioner	—
Engagement Reviewer	—
Report Status	Draft

Report generated by Paciolus® Diagnostic Intelligence. Engagement information entered by user.

I. Scope

```
Period Tested ... FY 2025 (January 1 – December 31, 2025)
Source ... Trial Balance Upload — FY2025 (meridian_tb_fy2025.xlsx)
Total Rows ..................................... 247
Total Columns ..................................... 7
Readiness Score ........................... 82.5 / 100
Assessment ..................................... Ready
```

Readiness Score Breakdown

Component	Weight	Score	Contribution
TB Balance Check	25%	100.0	25.0
Column Detection	20%	75.0	15.0
Data Completeness	15%	87.5	13.1
Duplicate Detection	10%	100.0	10.0
Encoding Quality	5%	100.0	5.0
Sign Convention	15%	100.0	15.0
Active Balances	10%	75.0	7.5
Total	100%		90.6 / 100

The automated data quality assessment procedures documented in this workpaper were performed on the trial balance data file provided by management for the period under examination. These procedures are designed to identify potential data anomalies that may warrant further investigation by the engagement team. The analysis was performed with reference to the FASB Accounting Standards Codification and applicable professional auditing standards.

II. Trial Balance Integrity Check

```
Total Debits ........................... $12,847,392.50
Total Credits .......................... $12,847,392.50
Difference ..................................... $0.00
```

Status: Balanced — Total debits equal total credits within rounding tolerance ($0.01).

III. Column Detection

Role	Detected Column	Confidence	Status	Downstream Use
Account_Name	Account Description	98%	Found	Not used in current analysis
Debit	Debit Balance	95%	Found	Not used in current analysis
Credit	Credit Balance	95%	Found	Not used in current analysis
Account_Number	Acct #	88%	Found	Not used in current analysis
Account_Type	Category	72%	Low Confidence	Not used in current analysis

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.

Currency	—	0%	Not Found	Not used in current analysis

Account_Type detection confidence (72%) is below the 80% threshold. The 'Category' column was matched to Account_Type with moderate confidence. Confirm the column mapping is correct before running tests that filter by account_type. Use the column override feature to manually assign the correct column if needed.

IV. Data Quality Issues

Category	Severity	Description	Affected	Tests	Remediation	Downstream Impact
Column Detection	MEDIUM	Column detection confidence is moderate (85%) — Currency column not detected, defaulting to USD	247	12	Add a 'Currency' column if multi-currency TB. Verify Account_Type mapping is correct.	All diagnostic tools depend on correct column mapping. Currency-dependent tests will default to USD for all 247 accounts.
Null Values	MEDIUM	15 rows have blank account descriptions	15	6	Fill in missing account names to improve classification accuracy	Missing values in critical columns produce incomplete trial balance totals, skewed ratio calculations, and may cause accounts to be silently excluded from testing tools.
Zero Balance	LOW	18 rows have zero balance in both debit and credit columns (7% of rows)	18	4	Zero-balance rows add noise to the analysis. Consider filtering them out if they represent closed or inactive accounts.	Zero-balance rows add noise to statistical tests (Benford's Law, sampling), inflate account counts, and reduce the signal-to-noise ratio in anomaly detection.
Encoding	LOW	2 account names contain non-ASCII characters (0.8% of rows)	2	3	Non-ASCII characters may cause matching issues. Consider normalizing account names to ASCII.	Non-ASCII characters can cause account matching failures in lead sheet mapping, classification rules, and cross-period comparisons.

Null Values — Affected: 4100, 4110, 4120, 4200, 4210, 4300, 4310, 4320, 4400, 4410 ... and 5 more

Zero Balance — Affected: Closed Account A, Closed Account B, Inactive - Supplies, Dormant Receivable, Old Equipment, Legacy Fund, Former Tenant Deposit, Retired Debt, Expired Prepaid, Archive Payable ... and 8 more

Encoding — Affected: Café Equipment Lease, Möbius Capital Reserve

Interpretive Context: The results presented herein reflect automated data analytics and are intended to support, not replace, professional judgment. Identified anomalies may indicate areas requiring additional inquiry but do not, in themselves, constitute evidence of error, fraud, or material misstatement. The engagement team should evaluate each flagged item in the context of the overall engagement risk assessment and perform corroborating procedures as deemed necessary under applicable professional standards.

V. Authoritative References

Body	Reference	Topic	Status
IAASB	ISA 500	Audit Evidence — Data Reliability	Current
IAASB	ISA 330	Auditor's Responses to Assessed Risks	Current

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.

IAASB	ISA 315	Identifying and Assessing Risks of Material Misstatement	Current

VI. Conclusion

The trial balance file (meridian_tb_fy2025.xlsx) achieved a Readiness Score of 82.5/100 — assessed as Ready with caveats. The file is suitable for downstream diagnostic testing subject to the following caveats: (1) Column detection confidence is moderate (85%) — Currency column not detected, defaulting to USD. Confirm the column mapping or use the override feature before proceeding. (2) 15 rows have blank account descriptions. Fill in missing values before running tests that rely on account classification. Remediate before final workpaper sign-off.

Paciolus Intelligence • Generated 23 Oct 2026 18:23 UTC • Meridian Capital Group, LLC • Period: FY 2025 (January 1 – December 31, 2025)

This memo documents automated data quality assessment testing procedures with reference to ISA 500 (Audit Evidence), ISA 330 (Auditor's Responses), and ISA 315 (Risk Assessment). Results represent data anomalies identified through analytics and are not conclusions regarding internal control effectiveness, fraud, or material misstatement risk. The auditor must evaluate each flagged item in the context of the engagement and perform additional procedures as necessary per professional standards. This memo does not constitute audit evidence sufficient to support an opinion without corroborating procedures. Generated by Paciolus — Zero-Storage Audit Intelligence.

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.
