Anomaly Summary Report

Client	Meridian Capital Group, LLC
Fiscal Year End	—
Period	Jan 01, 2025 – Dec 31, 2025
Source Document	Aggregated from individual tool runs
Source File	All executed diagnostic tool outputs
Reference	ANS-2026-1023-203
Generated	23rd October 2026
Engagement Practitioner	—
Engagement Reviewer	—
Report Status	Draft

Report generated by Paciolus® Diagnostic Intelligence. Engagement information entered by user.

I. Scope

Tools Executed: 8 of 18 available tools

Total Tool Runs: 14

Total Anomalies Identified: 12 | High: 4 | Medium: 5 | Low: 3

Tools with Clean Results: 3 (Payroll & Employee Testing, Bank Reconciliation, TB Diagnostics)

Engagement Risk Indicator: ELEVATED (40/100)

Basis: automated flag density **and** tool-coverage completeness — auditor judgment required per ISA 315. Tools not yet run add to the score, so an engagement with no anomalies can still show a higher tier. The indicator is not a risk assessment or a conclusion on internal control.

Tool	Runs	Last Run
TB Diagnostics	2	Feb 10, 2026 14:32
Journal Entry Testing	2	Feb 11, 2026 09:15
AP Payment Testing	1	Feb 11, 2026 10:48
Bank Reconciliation	2	Feb 14, 2026 09:00
Payroll & Employee Testing	1	Feb 11, 2026 11:22
Revenue Testing	2	Feb 12, 2026 08:45
AR Aging Analysis	1	Feb 12, 2026 10:30
Fixed Asset Testing	3	Feb 13, 2026 14:05

Tools Not Executed:

Tool	Status	Note
Multi-Period Comparison	Not Run	—
Three-Way Match Validator	Not Run	—
Inventory Testing	Not Run	—
Statistical Sampling	Not Run	—
Segregation of Duties	Not Run	—
Intercompany Elimination	Not Run	—
W-2 / W-3 Reconciliation	Not Run	—
Form 1099 Preparation	Not Run	—
Book-to-Tax Reconciliation	Not Run	—
Cash Flow Projector	Not Run	—

Tools listed as "Not Run" were not executed for this engagement. The auditor should consider whether the scope of analytics coverage is sufficient given the identified risk profile. Unexecuted tools may represent coverage gaps requiring alternative procedures.

The automated engagement anomaly summary procedures documented in this workpaper were performed on the engagement-level diagnostic results provided by management for the period under examination. These procedures are designed to identify potential data anomalies that may warrant further investigation by the engagement team. The analysis was performed with reference to the FASB Accounting Standards Codification and applicable professional auditing standards.

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.

II. Data Anomalies by Tool

Total Anomalies: 12 | High: 4 | Medium: 5 | Low: 3

AP Payment Testing (3 items) — WP-APT-001

Ref	#	Severity	Description
WP-APT-001	1	HIGH	2 exact duplicate payments totaling $14,200 to vendor 'Apex Office Solutions'
WP-APT-001	2	HIGH	3 payments processed before invoice date — potential prepayment anomaly
WP-APT-001	3	MEDIUM	5 payments just below $10,000 approval threshold on consecutive dates

AR Aging Analysis (2 items) — WP-ARA-001

Ref	#	Severity	Description
WP-ARA-001	1	LOW	Allowance-to-receivable ratio of 2.1% — below industry benchmark of 3–5%
WP-ARA-001	2	LOW	3 customers exceeding credit limits totaling $142,000 over-limit

Fixed Asset Testing (2 items) — WP-FAR-001

Ref	#	Severity	Description
WP-FAR-001	1	MEDIUM	2 assets with accumulated depreciation exceeding original cost
WP-FAR-001	2	LOW	12 fully depreciated assets still in use — potential impairment indicator

Journal Entry Testing (3 items) — WP-JET-001

Ref	#	Severity	Description
WP-JET-001	1	HIGH	3 unbalanced journal entries where debits do not equal credits
WP-JET-001	2	HIGH	4 journal entries posted on US federal holidays (Thanksgiving, Christmas)
WP-JET-001	3	MEDIUM	156 entries clustered in last 3 days of each month (10.4% flag rate)

Revenue Testing (2 items) — WP-RRT-001

Ref	#	Severity	Description
WP-RRT-001	1	MEDIUM	7 entries with potential cut-off risk — revenue recorded within 3 days of period end
WP-RRT-001	2	MEDIUM	Single customer represents 38% of total revenue — concentration risk

Payroll & Employee Testing (0 items)

✓ No anomalies identified. Population passed all configured test thresholds. See WP-PET-001 for detail.

Bank Reconciliation (0 items)

✓ No anomalies identified. Population passed all configured test thresholds. See WP-BRC-001 for detail.

TB Diagnostics (0 items)

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.

✓ No anomalies identified. Population passed all configured test thresholds. See WP-TBD-001 for detail.

Interpretive Context: The results presented herein reflect automated data analytics and are intended to support, not replace, professional judgment. Identified anomalies may indicate areas requiring additional inquiry but do not, in themselves, constitute evidence of error, fraud, or material misstatement. The engagement team should evaluate each flagged item in the context of the overall engagement risk assessment and perform corroborating procedures as deemed necessary under applicable professional standards.

III. Practitioner Assessment

Total Anomalies Requiring Response: 12

Assessments Completed: 0

Section III is INCOMPLETE. All anomalies require practitioner assessment before this report may be included in the engagement file.

Anomaly 1 (HIGH) — AP Payment Testing [WP-APT-001]

2 exact duplicate payments totaling $14,200 to vendor 'Apex Office Solutions'

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*
Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 2 (HIGH) — AP Payment Testing [WP-APT-001]

3 payments processed before invoice date — potential prepayment anomaly

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*
Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 3 (MEDIUM) — AP Payment Testing [WP-APT-001]

5 payments just below $10,000 approval threshold on consecutive dates

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.

Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 4 (LOW) — AR Aging Analysis [WP-ARA-001]

Allowance-to-receivable ratio of 2.1% — below industry benchmark of 3–5%

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*
Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 5 (LOW) — AR Aging Analysis [WP-ARA-001]

3 customers exceeding credit limits totaling $142,000 over-limit

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*
Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 6 (MEDIUM) — Fixed Asset Testing [WP-FAR-001]

2 assets with accumulated depreciation exceeding original cost

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*

Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 7 (LOW) — Fixed Asset Testing [WP-FAR-001]

12 fully depreciated assets still in use — potential impairment indicator

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*
Practitioner Classification Notes	[PRACTITIONER TO COMPLETE] *Classification of findings (e.g., deficiency, exception, inquiry) is a matter of auditor judgment and is outside the scope of this report.*
Follow-Up Procedures	[PRACTITIONER TO COMPLETE]
Initials / Date	___ / ___/___/_____

Anomaly 8 (HIGH) — Journal Entry Testing [WP-JET-001]

3 unbalanced journal entries where debits do not equal credits

Field	Response
Management Explanation	[PRACTITIONER TO COMPLETE]
Planned Response	[PRACTITIONER TO COMPLETE] *Document the response the engagement team intends to take (e.g., no change to planned procedures, expanded substantive testing, escalation, specialist referral). Whether control testing is appropriate is a matter of auditor judgment and engagement scope — this platform does not direct methodology.*

IV. Engagement Risk Assessment

ENGAGEMENT RISK INDICATOR: ELEVATED (40/100)

Basis: automated flag density **and** tool-coverage completeness — auditor judgment required per ISA 315. Tools not yet run add to the score, so an engagement with no anomalies can still show a higher tier. The indicator is not a risk assessment or a conclusion on internal control.

- 4 High-severity anomalies identified
- 10 of 18 tools not executed
- 12 total anomalies across 5 tools

The engagement risk indicator of ELEVATED (40/100) reflects the combination of 4 High-severity anomalies and incomplete tool coverage (10 of 18 tools not executed). The auditor should consider whether the current audit plan provides sufficient coverage given the identified risk profile, and should prioritize resolution of High-severity items before finalizing substantive procedures.

Sign-Off

DRAFT — INCOMPLETE: This report is in draft status until all Section III practitioner assessments are completed.

Prepared using Paciolus Diagnostic Intelligence. Does not constitute an audit, review, or attestation engagement.
