Cabinet Comptable de Conseils

This output supports professional judgment and internal evaluation. It does not constitute an audit, review, or attestation engagement.

Cash Conversion Ratio (OCF / Net Income) ... 1.26x

The OCF/NI ratio of 1.26x indicates that cash earnings exceed reported net income — strong earnings quality. Operating cash flow ($1,308,250.00) exceeds net income ($1,037,250.00), suggesting conservative accrual practices and reliable cash conversion.

A Cash Conversion Ratio consistently above 1.0x over multiple periods is generally considered a positive indicator of earnings quality. Ratios below 0.8x may indicate aggressive accrual accounting and warrant further analytical procedures.
